

## PROFILE

- More than 12 years' experience in Commercial Diving Operations.
- In my late teens I went down a different path than I had planned once I realized I could make my hobby a career as a diver.
- Experienced in working closely as part of a team, making quick decisions.
- Diligent and reliable
- Proficient in sticking to strict time limits and following plans set out by supervisors.
- I show initiative, am highly motivated, thrive on fresh challenges and enjoy learning new skills.
- Enthusiastic, trustworthy, and conscientious.
- I strive to deliver excellent results working alone and as part of a team.

## ASPIRATIONS

- I have always been passionate and enjoyed web design.
- After a fulfilling career in Commercial Diving I am more than ready to be part of a creative team and fulfill my passion of being a web developer.
- I am extremely keen and ready to learn from others and be part of a company where I can grow and further develop my skills.

## EDUCATION

### South Eastern Regional College 2008-2011

- Edexcel Level 3 BTEC National Diploma for ICT Practitioners 2011 (Distinction - Merit)

### Rudolf Steiner School, Holywood 2002-2008

- GCSEs obtained 2008

### SKILLS

- |              |                |
|--------------|----------------|
| - React JS   | - CSS & SCSS   |
| - Git        | - Tailwind CSS |
| - Typescript | - GraphQL      |

### HOBBIES

- |                |                |
|----------------|----------------|
| - Video Gaming | - Snowboarding |
| - Movies       | - Surfing      |
| - Diving       | - Traveling    |

## WORK EXPERIENCE

### Self Employed, Freelance Web Developer 2020-Present

#### Massage Website

- Using Gatsby and SCSS I created a Massage website that needed a relaxing feel to it and clearly showing the treatments provided by the client.
- I learnt a lot about the entire process from initial meeting with the client to finished product and everything in between.
- I had a professional client-based relationship where I had to listen to the client's feedback, fix issues, add new features to be added and general maintenance.

#### Lets Go Hydro

- When working for Big House Creative I was assigned the front-end development side of the project. The client had meetings with the Graphics Designer to draw the layout exactly as they wanted the first layout to look using InVision. At the end of each sprint I would plan out what I would need to do each day in order to keep on top of the work load.

#### Back End Experience

- I only have a small amount of Back-End experience but still learning bits as I go along to have a better understanding of it. I have been using CoinGecko API for a crypto currency website (Cryptocoach) to show each coin and every bit of information on that coin and underneath is a chart showing daily, weekly, monthly and yearly information on that specific coin selected.
- I have also created a complete Pokedex showing every pokemon with their stats, using a basic Pokemon API, as well as a Google Clone using their API.

### Self Employed, Commercial Diver 2012-Present

- Maintain personal and company equipment
- Communication with both client and close team colleagues.
- React quickly to solve problems and ensure challenges are met with calmness and rational thinking.
- Supervise and conduct hull inspections, damage analysis and civil engineering operations repair and maintenance.
- Prioritising personal and team safety above all else by carrying out risk assessments before diver enters the water.

### Memorise.ly 2022 - January 2023

- Working at Memorise.ly as a Junior developer I was tasked with working on tickets through Jira using React, Typescript and Tailwind CSS for the styling of the project.
- Completed weekly targets set out in sprint meetings.
- Met deadlines to ensure it was ready for the Alpha launch.
